## Does climate protection really leave you cold?

Refuel CO<sub>2</sub>-neutral with the DKV CARD *CLIMATE*.

You drive, we care.

## Climate protection that creates competitive advantages

You cannot make an omelette without breaking eggs. In the logistics industry this means: wherever we drive, we emit CO<sub>2</sub>. How a company deals with these emissions is questioned and proof demanded more and more often by business partners. Emissions can be avoided or reduced to a certain extent and DKV customers can offset 100% of the remaining CO<sub>2</sub> immediately. With the DKV CARD *CLIMATE*, DKV Euro Service is now offering the world's first climate-neutral fuel card.

DKV CARD *CLIMATE*

## Sustainable business benefits the brand

In return, your fleet will be driving 100% CO<sub>2</sub>-neutral. In addition to the beneficial effects on the environment, the positive life cycle assessment creates a clear competitive advantage and strengthens a company's brand. Business partners are increasingly preferring companies whose operations are carbon-neutral. To make this commitment recognisable by those outside the company, DKV Euro Service and myclimate offer certification. These certificates affirm a company's full offsetting of CO<sub>2</sub>-emissions.

## Active contribution to climate protection

Users of the DKV CARD *CLIMATE* are actively supporting climate protection. With every litre of fuel they purchase, they are investing an additional amount in certified climate protection projects and thus contributing to worldwide carbon neutrality.

DKV climate protection projects (all Gold Standard projects) include:

- » Wind energy in Turkey
- » Biomass cookers in China
- » Solar cookers in Madagascar

myclimate is a strong partner at DKV's side. The charitable organisation is one of the world's leading providers of offsetting measures. myclimate climate protection projects always fulfil the highest standards (CDM, Gold Standard, Plan Vivo).

You can find further information about myclimate and the projects at [www.myclimate.de](http://www.myclimate.de) and on the DKV website at [www.dkv-euroservice.com/card-climate](http://www.dkv-euroservice.com/card-climate).

Your partner for effective climate protection – global and local.
